Getting Started

**WARNING**
Always consult your physician before you begin or modify any exercise program. See the *Important Safety and Product Information* guide in the product box for product warnings and other important information.

When using your Edge® the first time, complete the following tasks:

1. Charge the Edge (page 2).
2. Install the Edge (page 2).
3. Turn on the Edge (page 4).
4. Acquire satellites (page 6).
5. Set up optional ANT+™ sensors (page 6).
6. Go for a ride (page 7).
7. Save your ride (page 7).
8. Get Garmin Connect™ or Garmin Training Center® software (page 7).
9. Transfer history to your computer (page 8).

**About the Battery**

**WARNING**
This product contains a lithium-ion battery. See the *Important Safety and Product Information* guide in the product box for product warnings and other important information.

The Edge is powered by a built-in, lithium-ion battery that you can recharge using the AC charger or the USB cable included in the product box.

**NOTE:** The Edge will not charge when outside the temperature range of 32°F to 122°F (0°C to 50°C).
Getting Started

Charging the Edge

**NOTICE**

To prevent corrosion, thoroughly dry the mini-USB port, the weather cap, and the surrounding area before charging or connecting to a computer.

1. Plug the AC charger into a standard wall outlet.
2. Pull up the weather cap from the mini-USB port.
3. Plug the small end of the AC charger into the mini-USB port.
   To connect the Edge to your computer using the USB cable, see page 8.
4. Charge the Edge for at least three hours before you begin using it.
   A fully charged battery can run for up to 18 hours before it must be recharged.

Installing the Edge

For the best GPS reception, position the bike mount so the front of the Edge is oriented toward the sky. You can install the bike mount on the stem (shown on page 3) or the handlebars.

1. Select a suitable and secure location to mount the Edge where it does not interfere with safe operation of your bike.
2. Place the rubber disk on the back of the bike mount.
   The rubber tabs align with the back of the bike mount so it stays in place.
3. Place the bike mount on the bike stem.
4. Attach the bike mount securely using the two bands.
5. Align the tabs on the back of the Edge with the bike mount notches.
6. Press down slightly and turn the Edge clockwise until it locks into place.

Releasing the Edge
1. Turn the Edge clockwise to unlock the device.
2. Lift the Edge off the mount.
Getting Started

Turning on the Edge
Press and hold POWER to turn on the Edge.

Configuring the Edge
The first time you turn on the Edge, you are prompted to configure system settings and user profile settings.

• Follow the on-screen instructions to complete the initial setup.
• Press ▼ or ▲ to view choices and change the default selection.
• Press ENTER to make a selection.

Getting Started

**Acquiring Satellite Signals**

It may take 30 to 60 seconds to acquire signals.

1. Go outdoors to an open area.
2. Make sure that the front of the Edge is oriented toward the sky.
3. Wait while the Edge searches for satellites.
   
   Do not begin moving until the locating satellite page disappears.

**NOTE:** To turn off the GPS receiver and use the Edge indoors, see page 45.

**Optional ANT+ Sensors**

**NOTE:** If you do not need to set up ANT+ sensors, you can skip this step.

To use an ANT+ sensor during your ride, you must install it and pair it with the Edge.

- For heart rate monitor instructions, see page 21.
- For GSC™ 10 speed and cadence sensor instructions, see page 25.
- For third-party ANT+ sensors, see page 30, refer to the manufacturer’s instructions, and go to www.garmin.com/intosports.
Going for a Ride
Before you can record history, you must acquire satellite signals (page 6).

1. Press and hold MENU to view the timer page.

2. Press START to start the timer.
   History is only recorded while the timer is running.

3. After completing your ride, press STOP.

Saving Your Ride Data
Press and hold RESET to save your ride data and reset the timer.

Using Free Software
Garmin provides two software options for storing and analyzing your ride data:

- Garmin Connect is Web-based software.
- Garmin Training Center is computer software that does not require the Internet after installation.

2. Follow the on-screen instructions to install the software.
Transferring History to Your Computer

1. Connect the USB cable to a USB port on your computer.
2. Pull up the weather cap from the mini-USB port.
3. Plug the small end of the USB cable into the mini-USB port.
5. Follow the instructions included with the software.
Training with Your Edge

Alerts
You can use Edge alerts to train toward specific time, distance, calorie, heart rate, cadence, and power goals.

Using Time, Distance, and Calorie Alerts
1. Press and hold MENU.
2. Select Training > Alerts.
3. Select Time Alert, Distance Alert, or Calorie Alert.
4. Turn on the alert.
5. Enter a time, distance, or calorie amount.
6. Go for a ride.
Each time you reach the alert amount, the Edge beeps and displays a message.

NOTE: To turn on audible tones for messages, see page 41.

Using Advanced Alerts
If you have an optional heart rate monitor, GSC 10, or third-party ANT+ power sensor, you can set up advanced alerts.

1. Press and hold MENU.
2. Select Training > Alerts.
3. Select an option:
   • Select HR Alert to set the minimum and maximum heart rate in beats per minute (bpm).

NOTE: For more information about heart rate zones and settings, see page 22.
Training with Your Edge

- Select **Cadence Alert** to set the fast and slow cadence amounts in revolutions of the crank arm per minute (rpm).
- Select **Power Alert** to set the minimum and maximum power amounts in watts.

4. Go for a ride.

Each time you exceed or drop below the specified heart rate, cadence, or power amount, the Edge beeps and displays a message.

**NOTE**: To turn on audible tones for messages, see page 41.

---

### Using Auto Lap by Distance

You can use Auto Lap® to automatically mark the lap at a specific distance. This feature is helpful for comparing your performance over different parts of a ride (for example, every 10 miles or 40 kilometers).

1. Press and hold **MENU**.
2. Select **Settings > Bike Settings > Auto Lap**.
3. In the **Auto Lap Trigger** field, select **By Distance**.
4. Enter a value.
5. Customize optional lap data fields (page 37).
6. Go for a ride.
Using Auto Lap by Position

You can use Auto Lap to automatically mark the lap at a specific position. This feature is helpful for comparing your performance over different parts of a ride (for example, a long climb or training sprints).

1. Press and hold MENU.
2. Select Settings > Bike Settings > Auto Lap.
3. In the Auto Lap Trigger field, select By Position.
4. Select an option:
   - Select Lap Press Only to trigger the lap counter each time you press LAP and each time you pass any of those locations again.
   - Select Start And Lap to trigger the lap counter at the GPS location where you press START and at any location during the ride where you press LAP.
   - Select Mark And Lap to trigger the lap counter at a specific GPS location marked before the ride and at any location during the ride where you press LAP.
5. Customize optional lap data fields (see page 37).
6. Go for a ride.

NOTE: During courses, use the By Position option to trigger laps at all of the lap positions saved in the course.
Training with Your Edge

Using Auto Pause
You can use Auto Pause® to pause the timer automatically when you stop moving or when your speed drops below a specified value. This feature is helpful if your ride includes stop lights or other places where you need to slow down or stop.

NOTE: The paused time is not saved with your history data.

1. Press and hold MENU.
2. Select Settings > Bike Settings > Auto Pause.
3. Select an option:
   - Select Off.
   - Select When Stopped to pause the timer automatically when you stop moving.
   - Select Custom Speed to pause the timer automatically when your speed drops below a specified value.
4. Customize optional time data fields (see page 37).
   To view the entire time (from pressing START to RESET), select the Time - Elapsed data field.
5. Go for a ride.

Using Auto Scroll
Use the auto scroll feature to automatically cycle through all of the training data pages while the timer is running.

1. Press and hold MENU.
2. Select Settings > Bike Settings > Auto Scroll.
3. Select a display speed: Slow, Medium, or Fast.
4. Go for a ride.
   The training data pages scroll automatically. You can press PAGE to manually switch pages.
Courses
Courses allow you to train using a previously recorded activity. You can follow the course trying to match or exceed previously set goals. For example, if the original course was completed in 30 minutes, you will race against a Virtual Partner® trying to complete the course in under 30 minutes.

Garmin recommends that you use Garmin Connect or Garmin Training Center (page 7) to create courses. You can then transfer the courses to your Edge (page 35).

Course Points
You must use Garmin Training Center to add course points to any course. You can add course points, or places on your course that you want to remember, such as water stops or distance goals.

Creating Courses with Your Edge
Before you can create a course, you must have history with GPS track data saved to the Edge.

1. Press and hold MENU.
2. Select Training > Courses > New.
3. Select a previous ride on which to base your course.
   The Edge assigns a default name to your new course that appears in the list.
4. Select the course from the list.
5. Select Edit Course to rename the course.
6. Enter a descriptive course name in the top field (for example, 18mi_Ridgeview).
Starting a Course
1. Press and hold **MENU**.
2. Select **Training > Courses**.
3. Select the course from the list.
4. Select an option:
   - Select **Do Course**.
   - Select **Map** to preview the course, and press **BACK** to return to the course list.
   - Select **Profile** to preview the elevation profile, and press **BACK** to return to the course list.
5. Press **START**.
   History is recorded even if you are not on the course. The “Course Complete” message appears when you finish.
6. Go for a ride.

7. Press **PAGE** to view the data pages:
Off Course Options
You can include a warmup before you begin your course. Press **START** to begin the course, and then warm up as normal. Stay away from your course path as you warm up. When you are ready to begin, head toward your course. When you are on any part of the course path, the Edge displays an “On Course” message.

**NOTE**: As soon as you press **START**, your Virtual Partner starts the course and does not wait for you to warm up.

If you stray away from the course, the Edge displays an “Off Course” message. Use the course map or course points to find your way back to the course.
Training with Your Edge

Changing the Course Speed
1. Press and hold MENU.
2. Select Training > Courses.
3. Select the course from the list.
4. Select Do Course.
5. Press LIGHT.
6. Use ▼ and ▲ to adjust the percentage of time to complete the course.

For example, to improve your course time by 20%, enter a course speed of 120%. You will race against the Virtual Partner to finish a 30-minute course in 24 minutes.

Stopping a Course
Press and hold MENU, and select Training > Stop Course.

Deleting a Course
1. Press and hold MENU.
2. Select Training > Courses.
3. Select a course.
4. Select Delete Course > Yes.

Workouts
You can use the Edge to create workouts that include goals for each workout step and for varied distances, times, and rest laps. After you create a workout, you can use Garmin Connect or Garmin Training Center to schedule the workout for a particular day. You can plan workouts in advance and store them on your Edge.
Creating Workouts
Garmin recommends that you use Garmin Connect or Garmin Training Center (page 7) to create workouts. You can then transfer the workouts to your Edge (page 35). However, you can also create and save a workout directly on your Edge.

1. Press and hold MENU.
2. Select Training > Workouts > New.
3. Enter a descriptive workout name in the top field (for example, QUICK 10).
4. Select Add New Step.
5. Select Duration to specify how the step will be measured.
   For example, select Distance to end the step after a specific distance.
   If you select Open, you can press LAP to end the step during your workout.
6. If necessary, enter a value in the field below Duration.
7. Select Target to choose your goal during the step.
   For example, select Heart Rate to maintain a consistent heart rate during the step.
8. If necessary, select a target zone or enter a custom range.
   For example, you can select a heart rate zone. Each time you exceed or drop below the specified heart rate, the Edge beeps and displays a message.
9. If necessary, select Yes in the Rest Lap field.
   During a rest lap, the timer continues to run and data is recorded.
10. Press BACK to continue.
11. Repeat steps 4–9 to add another new step.
Training with Your Edge

Repeating Workout Steps
Before you can repeat a workout step, you must create a workout with at least one step.

1. Select **Add New Step**.

2. In the **Duration** field, select an option.
   - Select **Repeat** to repeat a step one or more times.
     For example, you can repeat a 5-mile step ten times.
   - Select **Repeat Until** to repeat a step for a specific duration.
     For example, you can repeat a 5-mile step for 60 minutes or until your heart rate reaches 160 bpm.

3. In the **Back To Step** field, select a step to repeat.

4. If necessary, select **Yes** in the **Rest Lap** field.

5. Press **BACK** to continue.

Starting a Workout

1. Press and hold **MENU**.

2. Select **Training > Workouts**.

3. Select the workout.

4. Select **Do Workout**.

5. Press **START**.

6. Go for a ride.

7. Press **PAGE** to view the data pages:
   After you begin a workout, the Edge displays each step of the workout, the goal (if any), and current workout data. An audible alarm sounds when you are about to finish a workout step. A message appears, counting down the time or distance until a new step begins.

Ending a Step

Press **LAP** to end a step early.
Stopping a Workout
1. Press **STOP** to stop the timer.
2. Press and hold **RESET** to save your ride data and reset the timer.

About Editing Workouts
You can edit workouts within Garmin Connect, Garmin Training Center, or directly in the Edge. If you edit workouts in the Edge, your changes may be temporary. Garmin Connect and Garmin Training Center serve as the master list of workouts. If you edit a workout in the Edge, the changes might be overwritten the next time you transfer workouts from Garmin Connect or Garmin Training Center. To make a permanent change to a workout, edit the workout in Garmin Connect or Garmin Training Center and then transfer it to your Edge.

Editing a Workout Using the Edge
1. Press and hold **MENU**.
2. Select **Training > Workouts**.
3. Select the workout.
4. Select **Edit Workout**.
5. Select the step.
6. Select **Edit Step**.
7. Make any necessary changes, and press **BACK** to continue.
8. Press **BACK** to save and to exit.

Deleting a Workout
1. Press and hold **MENU**.
2. Select **Training > Workouts**.
3. Select the workout.
4. Select **Delete Workout > Yes**.
ANT+ Sensors

The Edge is compatible with the following ANT+ accessories:

- Heart rate monitor (page 21)
- GSC 10 speed and cadence sensor (page 25)
- Third-party ANT+ sensors (page 30)

For information about purchasing additional accessories, go to http://buy.garmin.com.

Tips for Pairing ANT+ Sensors with Your Garmin Device

- Make sure that the ANT+ sensor is compatible with your Garmin device.
- Before you pair the ANT+ sensor with your Garmin device, move 10 m away from other ANT+ sensors.
- Bring the Garmin device within range (3 m) of the ANT+ sensor.
- After you pair the first time, your Garmin device automatically recognizes the ANT+ sensor each time it is activated. This process occurs automatically when you turn on the Garmin device and only takes a few seconds when the sensors are activated and functioning correctly.
- When paired, your Garmin device only receives data from your sensor, and you can go near other sensors.
Putting on the Heart Rate Monitor

Wear the heart rate monitor directly on your skin, just below your breastplate. It should be snug enough to stay in place during your ride.

1. Push one tab on the strap through the slot in the heart rate monitor.
2. Press the tab down.
3. Wet both electrodes on the back of the heart rate monitor to create a strong connection between your chest and the transmitter.
4. Wrap the strap around your chest and attach it to the other side of the heart rate monitor. The Garmin logo should be right-side up.

After you put on the heart rate monitor, it is on standby and ready to send data.
Using the Heart Rate Monitor

For the most accurate calorie data during your ride, set your maximum heart rate, resting heart rate, and heart rate zones using Garmin Connect or Garmin Training Center.

1. Turn on the Edge.
2. Bring the Edge within range (3 m) of the heart rate monitor.
3. Press and hold MENU.
4. Select Settings > Bike Settings > Heart Rate > ANT+ HR.
5. Select Yes > Rescan.
6. Press BACK to return to the main menu.

When the heart rate monitor is paired, a message appears and the heart rate icon appears on the main menu.

7. Customize optional data fields (page 37).
8. Go for a ride.

TIP: If heart rate data does not appear or if you have erratic heart rate data, you may have to tighten the strap on your chest or warm up for 5 to 10 minutes (see page 31).

Viewing Your Heart Rate Zones and Settings

The Edge uses your user profile information from the initial setup to determine your heart rate zones.

1. Press and hold MENU.
2. Select Settings > Bike Settings > Heart Rate > HR Zones.

NOTE: You can customize your maximum heart rate, resting heart rate, and heart rate zones using Garmin Connect or Garmin Training Center (page 8).
### Heart Rate Zones

<table>
<thead>
<tr>
<th>% of Maximum Heart Rate or Resting Heart Rate</th>
<th>Perceived Exertion</th>
<th>Benefits</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 50% to 60%</td>
<td>Relaxed, easy pace; rhythmic breathing</td>
<td>Beginning-level aerobic training; reduces stress</td>
</tr>
<tr>
<td>2 60% to 70%</td>
<td>Comfortable pace; slightly deeper breathing, conversation possible</td>
<td>Basic cardiovascular training; good recovery pace</td>
</tr>
<tr>
<td>3 70% to 80%</td>
<td>Moderate pace; more difficult to hold conversation</td>
<td>Improved aerobic capacity; optimal cardiovascular training</td>
</tr>
<tr>
<td>4 80% to 90%</td>
<td>Fast pace and a bit uncomfortable; breathing forceful</td>
<td>Improved anaerobic capacity and threshold; improved speed</td>
</tr>
<tr>
<td>5 90% to 100%</td>
<td>Sprinting pace, unsustainable for long period of time; labored breathing</td>
<td>Anaerobic and muscular endurance; increased power</td>
</tr>
</tbody>
</table>
About Heart Rate Zones

**CAUTION**
Consult your physician to specify heart rate zones that are appropriate for your fitness level and health condition.

Many athletes use heart rate zones to measure and increase their cardiovascular strength and improve their level of fitness. A heart rate zone is a specified range of heartbeats per minute. The five commonly accepted heart rate zones are numbered from 1 to 5 according to increasing intensity.

How do heart rate zones affect your fitness goals? Knowing your heart rate zones can help you measure and improve your fitness by understanding and applying these principles:

- Your heart rate is a good measure of exercise intensity.
- Training in specific heart rate zones can help you improve cardiovascular capacity and strength.
- Knowing your heart rate zones can prevent you from overtraining and can decrease your risk of injury.

Replacing the Heart Rate Monitor Battery
The heart rate monitor contains a user-replaceable CR2032 battery.

**NOTE:** Contact your local waste disposal department to properly dispose of batteries.

1. Locate the circular battery cover on the back of the heart rate monitor.
2. Use a coin to twist the cover counter-clockwise so the arrow on the cover points to **OPEN**.

3. Remove the cover and battery.

4. Wait 30 seconds.

5. Insert the new battery with the positive side facing up.

   **NOTE**: Be careful not to damage or lose the O-ring gasket on the cover.

6. Use a coin to twist the cover clockwise so the arrow on the cover points to **CLOSE**.

---

### Installing the GSC 10

Both magnets must be aligned with their respective indication lines for the Edge to receive data.

1. Place the GSC 10 on the rear chain stay (on the side opposite the drive train).

   **NOTE**: Place the flat rubber pad or the triangle-shaped rubber pad between the GSC 10 and the chain stay for stability.
2. Loosely attach the GSC 10 using two cable ties.

3. Attach the pedal magnet to the crank arm using the adhesive mount and a cable tie. The pedal magnet must be within 5 mm of the GSC 10. The indication line on the pedal magnet must line up with the indication line on the GSC 10.

4. Unscrew the spoke magnet from the plastic piece.

5. Place the spoke in the groove of the plastic piece and tighten slightly. The spoke magnet can face away from the GSC 10 if there is not enough room between the sensor arm and the spoke. The spoke magnet must line up with the indication line on the sensor arm.
6. Loosen the screw on the sensor arm.
7. Move the sensor arm to within 5 mm of the spoke magnet.
   You can also tilt the GSC 10 closer to either magnet for improved alignment.
8. Press the **Reset** button on the GSC 10.
   The LED turns red, then green.
9. Pedal to test the sensor alignment.
   The red LED blinks each time the pedal magnet passes the sensor.
   The green LED blinks each time the spoke magnet passes the sensor arm.
   **NOTE**: The LED blinks for the first 60 passes after a reset. Press **Reset** again if you require additional passes.
10. When everything is aligned and working correctly, tighten the cable ties, the sensor arm, and the spoke magnet.
Using the GSC 10

1. Turn on the Edge.
2. Bring the Edge within range (3 m) of the GSC 10.
3. Press and hold MENU.
5. Select Yes > Rescan.
6. Press BACK to return to the main menu.
   When the GSC 10 is paired, a message appears and the cadence icon appears on the main menu.
7. Customize optional data fields (page 37).
8. Go for a ride.

About the GSC 10

Cadence data from the GSC 10 is always recorded. If there is no GSC 10 paired, GPS data is used to calculate the speed and distance.

Cadence is your rate of pedaling or “spinning” measured by the number of revolutions of the crank arm per minute (rpm). There are two sensors on the GSC 10: one for cadence and one for speed.

For information about cadence alerts, see page 9.

Non-Zero Averaging for Cadence Data

The non-zero data-averaging setting is available if you are training with an optional cadence sensor. The default setting is to exclude zero values that occur when you are not pedaling.
To turn the non-zero averaging on or off, press and hold **MENU**, and select **Settings > Bike Settings > Data Avg.**

**Replacing the GSC 10 Battery**

The GSC 10 contains a user-replaceable CR2032 battery.

**NOTE:** Contact your local waste disposal department to properly dispose of batteries.

1. Locate the circular battery cover on the side of the GSC 10.

2. Use a coin to twist the cover counter-clockwise until it is loose enough to remove (arrow points to unlocked).

3. Remove the cover and battery.

4. Wait 30 seconds.

5. Insert the new battery with the positive side facing up.

**NOTE:** Be careful not to damage or lose the O-ring gasket on the cover.

6. Use a coin to twist the cover back into place (arrow points to locked).
ANT+ Sensors

Third-Party ANT+ Sensors
For a list of third-party ANT+ sensors that are compatible with the Edge, go to www.garmin.com/intosports.

Calibrating Your Power Meter
For calibration instructions specific to your power meter, refer to the manufacturer’s instructions.

Before you can calibrate your power meter, it must be properly installed and actively recording data.

1. Press and hold MENU.
3. Keep your power meter active by pedaling until the message appears.

Viewing Your Power Zones
You can set seven custom power zones using Garmin Connect or Garmin Training Center. If you know your FTP (functional threshold power) value, you can enter it and allow the software to calculate your power zones automatically.

1. Press and hold MENU.

Non-Zero Averaging for Power Data
The non-zero data-averaging setting is available if you are training with an optional power meter. The default setting is to exclude zero values that occur when you are not pedaling.

To turn the non-zero averaging on or off, press and hold MENU, and select Settings > Bike Settings > Data Avg.
## ANT+ Sensor Troubleshooting

<table>
<thead>
<tr>
<th>Problem</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>The ANT+ sensor will not pair with my device.</td>
<td>• Stay 10 m away from other ANT sensors while pairing.</td>
</tr>
<tr>
<td></td>
<td>• Bring the device within range (3 m) of the heart rate monitor while pairing.</td>
</tr>
<tr>
<td></td>
<td>• If the problem persists, replace the battery.</td>
</tr>
<tr>
<td>I have a third-party ANT+ sensor.</td>
<td>Make sure that it is compatible with the Edge (<a href="http://www.garmin.com/intosports">www.garmin.com/intosports</a>).</td>
</tr>
<tr>
<td>The heart rate monitor strap is too big.</td>
<td>A smaller elastic strap is sold separately. Go to <a href="http://buy.garmin.com">http://buy.garmin.com</a>.</td>
</tr>
</tbody>
</table>
## ANT+ Sensors

<table>
<thead>
<tr>
<th><strong>Problem</strong></th>
<th><strong>Solution</strong></th>
</tr>
</thead>
</table>
| The heart rate data is inaccurate or erratic. | • Make sure that the heart rate monitor is snug against your body.  
• Reapply moisture to the electrodes. Use water, saliva, or electrode gel.  
• Clean the electrodes. Dirt and sweat residue on the electrodes can interfere with heart rate signals.  
• Position the heart rate monitor on your back instead of your chest.  
• Wear a cotton shirt or wet your shirt if suitable for your activity. Synthetic fabrics that rub or flap against the heart rate monitor can create static electricity that interferes with heart rate signals.  
• Move away from sources of strong electromagnetic fields and some 2.4 GHz wireless sensors, which can interfere with your heart rate monitor. Sources of interference may include high-voltage power lines, electric motors, microwave ovens, 2.4 GHz cordless phones, and wireless LAN access points. |
**History**

Your Edge automatically saves history when the timer is started. The Edge can save at least 180 hours of ride data with typical use. When the Edge memory is full, a message appears. The Edge does not automatically delete or overwrite your history. See page 34 to learn how to delete history.

Upload your history (page 8) to Garmin Connect or Garmin Training Center periodically to keep track of all of your ride data.

History includes time, distance, calories, average speed, maximum speed, altitude, and detailed lap information. Edge history can also include heart rate, cadence, and power.

**NOTE:** History is not recorded while the timer is stopped or paused.

**Viewing History**

1. Press and hold **MENU**.
2. Select **History > Activities**.

3. Choose an option:
   - Use ▼ and ▲ to scroll through your activities.
   - Select **View More** to view the details for the entire ride or for each lap.
History

Viewing Distance and Time Totals
Press and hold MENU, and select History > Totals to view the accumulated ride distance and time.

Deleting History
After you have transferred your history to your computer, you may want to delete the history from your Edge.

1. Press and hold MENU.
2. Select History > Delete.
3. Select an option:
   - Select Indv. Activities to delete one activity at a time.
   - Select All Activities to delete all ride data from the history.
   - Select Old Activities to delete activities recorded more than one month ago.
   - Select All Totals to reset the ride distance and time totals.

4. Select Yes.

Data Recording
The Edge uses smart recording. It records key points where you change direction, speed, or heart rate.

When a third-party power meter (page 30) is paired, the Edge records points every second. Recording points every second uses more of the available memory on the Edge, but creates a very accurate record of your ride.

NOTE: This does not delete any history.
Data Management

You can use the Edge as a USB mass storage device.

NOTE: The Edge is not compatible with Windows® 95, 98, Me, or NT. It is also not compatible with Mac® OS 10.3 and earlier.

Connecting the USB Cable

To prevent corrosion, thoroughly dry the mini-USB port, the weather cap, and the surrounding area before charging or connecting to a computer.

1. Connect the USB cable to a USB port on your computer.
2. Pull up the weather cap from the mini-USB port.
3. Plug the small end of the USB cable into the mini-USB port.

Your device appears as a removable drive in My Computer on Windows computers and as a mounted volume on Mac computers.

Loading Files

After you have connected the device to your computer, you can manually load the following files to your Edge: .tcx, .fit, and .crs.

1. Browse your computer for the file.
2. Select Edit > Copy.
3. Open the “Garmin” drive or volume.
4. Open the “NewFiles” folder.
5. Select Edit > Paste.
Data Management

Deleting Files

**NOTICE**
Your device memory contains important system files that should not be deleted.

After you have connected the device to your computer, you can manually delete files.

1. Open the Garmin drive or volume.
2. Select the file.
3. Press the **Delete** key on your keyboard.

Disconnecting the USB Cable

When you are finished managing your files, you can disconnect the USB cable.

1. Complete an action:
   - For Windows computers, click the eject icon in your system tray.
   - For Mac computers, drag the volume icon to the Trash.
2. Unplug the device from your computer.
Settings

You can customize the following settings and features:

- Data fields (page 38)
- System settings (page 41)
- User profiles (page 43)
- Bike profiles (page 43)
- GPS settings (page 45)

Customizing Your Data Fields

You can set up custom data fields for three training data pages.

1. Press and hold MENU.
2. Select Settings > Bike Settings > Data Fields.
3. Select one of the pages.
4. Select the number of data fields you want to see on this page.
5. Use ▼, ▲, and ENTER to change the data fields.
6. Repeat steps 3 through 5 for each page you want to customize.

To turn off an optional page, set the number of data fields to zero.
Data Fields
Data fields with the * symbol display statute or metric units. Data fields with the ** symbol require an ANT+ sensor.

### Changing Your System Settings

**Changing the Audible Tones**

1. Press and hold **MENU**.
2. Select **Settings > System > Tones**.
3. Turn the tones for keys and messages on or off.

**Changing the Backlight**

1. Press and hold **MENU**.
2. Select **Settings > System > Display**.
3. Change the settings:
   - Select **Backlight Timeout** to change the amount of time the backlight stays on.
     **TIP**: Use a short backlight setting to conserve battery power.
   - Select **Backlight Level** to change the brightness.
   - Select **Contrast** to change the level of screen contrast.
Settings

Changing the Configuration Settings
You can modify all of the settings you configured in the initial setup.

1. Press and hold MENU.
2. Select Settings > System.
3. Select an option:
   - Select System Setup to modify language, position format, unit format, and time format.
   - Select Initial Setup to modify all of the configuration settings in the initial setup.
4. Follow the on-screen instructions.

Time Zones and Time Formats
Each time you turn on the Edge and acquire satellites, the Edge automatically detects your time zone and the current time of day. To change the time format to 12 hour or 24 hour, you must change the configuration settings in the system setup (page 42).

Changing the Auto Power Down Setting
This feature automatically turns the Edge off after 15 minutes of inactivity.

1. Press and hold MENU.
3. Select On or Off.
Changing Your User Profile Settings

The Edge uses information that you enter about yourself to calculate accurate ride data.

1. Press and hold **MENU**.
2. Select **Settings > User Profile** to update gender, age, weight, height, and activity class settings.
   - Use the table on page 53 to determine your activity class.
3. Follow the on-screen instructions.

About Calories
Calorie expenditure and heart rate analysis technology is provided and supported by Firstbeat Technologies Ltd. For more information, go to www.firstbeattechnologies.com.

Updating Your Bike Profile

You can customize three bike profiles. The Edge uses the bike weight, the odometer value, and the wheel size to calculate accurate ride data.

1. Press and hold **MENU**.
2. Select **Settings > Bike Settings > [Bike 1] > Bike Details**.
3. Enter a name for the bike profile.
4. Enter the bike weight and the odometer value.
5. In the **Wheel Size** field, select an option:
   - Select **Auto** to calculate your wheel size using GPS distance.
   - Select **Custom** to enter your wheel size. For a table of wheel sizes and circumferences, see page 51.
Settings

Switching Bikes
After you customize your bike profiles on the Edge, select your bike.

1. Press and hold **MENU**.
2. Select **Settings > Bike Settings > [Active Bike Name] > Bike Details**.
3. Select the bike you want to use.

Changing the Start Notice
This feature automatically detects when your Edge has acquired satellites and is moving. It is a reminder to start the timer so you can record your ride data.

1. Press and hold **MENU**.
2. Select **Settings > Bike Settings > Start Notice**.

3. In the **Mode** field, select an option:
   - Select **Off**.
   - Select **Once**.
   - Select **Repeat** to change the amount of time to delay the reminder.

Speed Zones
Your Edge contains several different speed zones, ranging from very slow (Climb 4) to very fast (Max Speed). The values for the zones are default values and may not match your personal abilities. You can customize your zones using Garmin Connect or Garmin Training Center (page 8).

Viewing Your Speed Zones
1. Press and hold **MENU**.
2. Select **Settings > Bike Settings > Speed Zones**.
GPS Settings
GPS settings include the following:

- Turning satellites off (page 45)
- Viewing the satellite page (page 45)
- Using elevation points (page 46)

Training Indoors
1. Press and hold MENU.
2. Select **GPS > GPS Status**.
3. Select **Off**.

When GPS is off, speed and distance data are not available unless you have an optional sensor that sends speed and distance data to the Edge (such as the GSC 10. The next time you turn on the Edge, it will search for satellite signals again.

Satellite Page
The satellite page shows your current GPS satellite information. To view the satellite page, press and hold **MENU**, and select **GPS > Satellite**.

On the satellite page, GPS accuracy appears at the top of the page. The black bars represent the strength of each satellite signal received (the number of the satellite appears below each bar).

For more information about GPS, go to [www.garmin.com/aboutGPS](http://www.garmin.com/aboutGPS).
Setting Elevation Points
You can save up to 10 elevation points. Using an elevation point each time you begin a particular training ride provides more-consistent and more-accurate elevation data.

1. Press and hold **MENU**.
2. Select **GPS > Set Elevation**.
3. Enter a descriptive name.
4. Enter the known elevation.
5. Select **Save**.

The next time you start the timer, the Edge automatically searches for elevation points within 30 m of your location. The Edge uses the elevation data as the starting point.

Editing Elevation Points
1. Press and hold **MENU**.
2. Select **GPS > Elevation Points**.
3. Select the elevation point you want to edit.
4. Edit the name and elevation.

Deleting Elevation Points
If you do not want to use a saved elevation point, you must delete the elevation point from your Edge.

1. Press and hold **MENU**.
2. Select **GPS > Elevation Points**.
3. Select the elevation point you want to delete.
4. Select **Delete**.
Appendix

Registering Your Device
Help us better support you by completing our online registration today:

- Keep the original sales receipt, or a photocopy, in a safe place.

About the Edge
To display important software information and your unit ID, press and hold MENU, and select Settings > About Edge.

Updating the Software
1. Select an option:
2. Follow the on-screen instructions.

Contacting Garmin Product Support
Contact Garmin Product Support if you have any questions about this product:

- In the USA, go to www.garmin.com/support, or contact Garmin USA by phone at (913) 397.8200 or (800) 800.1020.
- In the UK, contact Garmin (Europe) Ltd. by phone at 0808 2380000.
- In Europe, go to www.garmin.com/support and click Contact Support for in-country support.
information, or contact Garmin (Europe) Ltd. by phone at +44 (0) 870.8501241.

Using the Backlight

- Press **LIGHT** to turn on the backlight.
- Press any button to extend the backlight another 15 seconds.

**NOTE**: Alerts and messages also activate the backlight.
- Change the backlight settings (page 41).

Buying Optional Accessories

Go to [http://buy.garmin.com](http://buy.garmin.com), or contact your Garmin dealer for information about optional accessories and replacement parts.

## Troubleshooting

<table>
<thead>
<tr>
<th>Problem</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>The buttons do not respond. How do I reset the Edge?</td>
<td>Press and hold <strong>POWER</strong>, <strong>MENU</strong>, and <strong>RESET</strong> simultaneously to reset the Edge. <strong>NOTE</strong>: This does not erase any of your data or settings.</td>
</tr>
</tbody>
</table>
| I want to clear all the user data from my Edge.                        | 1. Turn off the Edge.  
2. Press and hold **POWER** and **RESET** until the message appears.  
3. Select **Yes** to clear all user data.  
**NOTE**: This deletes all user-entered information, but it does not delete your history. |
| My Edge does not acquire satellite signals.                            | 1. Take your Edge out of parking garages and away from tall buildings and trees.  
2. Turn on the Edge.  
3. Remain stationary for several minutes. |
<p>| The battery gauge does not seem accurate.                              | Allow the Edge battery to fully discharge, and then fully charge the battery (without interrupting the charge cycle). |
| The battery does not last long.                                        | Reduce the backlight time (page 41).                                      |
| How do I know my Edge is in USB mass storage mode?                     | You should see a new removable disk drive in My Computer on Windows computers and a mounted volume on Mac computers. |</p>

<th><strong>Solution</strong></th>
</tr>
</thead>
</table>
| My Edge is connected to the computer, but it will not go into mass storage mode. | You may have loaded a corrupted file.  
1. Disconnect the Edge from your computer.  
2. Turn off the Edge.  
3. Press and hold **MENU** while you connect the Edge to your computer.  
   Continue pressing **MENU** for 10 seconds or until the Edge goes into mass storage mode. |
| I cannot see any new removable drives in my list of drives.               | If you have several network drives mapped on your computer, Windows may have trouble assigning drive letters to your Garmin drives. See the Help file for your operating system to learn how to assign drive letters. |
| My course file was renamed.                                               | You can load .tcx and .crs files to the Edge. When you select the course for any reason, the file is converted to a .fit course file.       |
| Some of my data is missing from my Edge history.                          | When the Edge memory is full, it will no longer record data. Transfer data to your computer regularly to avoid losing data.                  |
| I need to replace the bands for the mount.                               | Go to [http://buy.garmin.com](http://buy.garmin.com), or contact your Garmin dealer. Purchase bands made of EPDM only.                         |
