Introduction

**WARNING**
Always consult your physician before you begin or modify any exercise program. See the *Important Safety and Product Information* guide in the product box for product warnings and other important information.

**Setting Up the Device**
When using your Edge® the first time, follow the setup instructions in the *Edge 800 Quick Start Manual*.

**Registering Your Device**
Help us better support you by completing our online registration today.

- Go to [http://my.garmin.com](http://my.garmin.com).
- Keep the original sales receipt, or a photocopy, in a safe place.

**About the Battery**

**WARNING**
This product contains a lithium-ion battery. See the *Important Safety and Product Information* guide in the product box for product warnings and other important information.

The device is powered by a built-in, lithium-ion battery that you can charge using the AC charger or the USB cable included in the product box (page 47).

**NOTE:** The device will not charge when outside the temperature range of 32°F–113°F (0°C–45°C).
Introduction

Device Overview

Keys

- **Press and hold to turn the device on and off.**
- **Press to view the status page and adjust the backlight.**

<table>
<thead>
<tr>
<th>LAP/RESET</th>
<th>Press to create a new lap. Press and hold to save your ride and reset the timer.</th>
</tr>
</thead>
<tbody>
<tr>
<td>START/STOP</td>
<td>Press to start and stop the timer.</td>
</tr>
</tbody>
</table>

Touchscreen Buttons

- **Select to view satellites and open the GPS settings menu.**
- **Select to open the settings menu.**
  - When viewing a course, select to view additional features.
- **Select to delete a course, workout, or activity.**
- **Select to close the page without saving.**
- **Select to save your changes and close the page.**
- **Select to return to the previous page.**
- **Select to change pages or scroll.** You can also swipe your finger across the touchscreen.
- **Select to narrow your search by entering part of the name.**
**Tips and Shortcuts**

**Locking the Touchscreen**
To avoid accidental screen touches, you can lock the touchscreen.

1. Press ⏰.
   The status page appears.
2. Select **Lock**.

**Switching Bikes**
1. Press ⏰.
   The status page appears.
2. Select 🌼 to switch bikes.

**Using the Backlight**
- At any time, tap the touchscreen to turn on the backlight.
- Press ⏰ to turn on the backlight and to adjust the brightness.

**NOTE**: Alerts and messages also activate the backlight.

- Change the backlight timeout (page 47).

**Changing the ANT+ Accessory Settings**
1. Press ⏰.
   The status page appears.
2. Select 🌼, 🌼, or 🌼.

**Changing Data Fields**
On any data page, touch and hold a data field until it is highlighted.

When you lift your finger, you are prompted to select a new data field (page 31).
Training

Going for a Ride
Before you can record history, you must locate satellite signals or pair your Edge with an ANT+™ sensor (page 17).

1. From the timer page, press START to start the timer.
   History is recorded only while the timer is running.
2. After completing your ride, press STOP.

Saving Your Ride Data
Press and hold RESET to save your ride data and reset the timer.

Alerts
You can use Edge alerts to train toward specific time, distance, calorie, heart rate, cadence, and power goals.

Using Time, Distance, and Calorie Alerts
1. Select MENU > Training > Alerts.
2. Select Time Alert, Distance Alert, or Calorie Alert.
3. Turn on the alert.
4. Enter a time, distance, or calorie amount.
5. Go for a ride.
Each time you reach the alert amount, the Edge beeps and displays a message.

NOTE: To turn on audible tones for messages, see page 41.
Using Advanced Alerts
If you have an optional heart rate monitor, GSC™ 10, or third-party ANT+ power sensor, you can set up advanced alerts.

1. Select MENU > Training > Alerts.
2. Select an option:
   • Select Heart Rate Alert to set the minimum and maximum heart rate in beats per minute (bpm).
   **NOTE:** For more information about heart rate zones and settings, see page 13.
   • Select Cadence Alert to set the minimum and maximum cadence in revolutions of the crank arm per minute (rpm).
   • Select Power Alert to set the minimum and maximum power in watts.
3. Go for a ride.
Each time you exceed or drop below the specified heart rate, cadence, or power amount, the Edge beeps and displays a message.

**NOTE:** To turn on audible tones for messages, see page 41.

Workouts
You can use the Edge to create workouts that include targets for each workout step and for varied distances, times, and rest laps. After you create a workout, you can use Garmin Connect™ or Garmin Training Center® to schedule the workout for a particular day. You can plan workouts in advance and store them on your Edge.
Creating Workouts
You can create workouts using Garmin Training Center (page 20) and transfer them to the Edge. However, you can also create and save a workout directly on your Edge.

1. Select MENU > Training > Workouts > New Workout.
2. Enter a workout name.
3. Select <Add New Step>.
4. Select Duration to specify how the step will be measured.
   For example, select Distance to end the step after a specific distance.
   If you select Open, you can press LAP to end the step during your workout.
5. If necessary, enter a value in the field below Duration.
6. Select Target to choose your goal during the step.
7. If necessary, select a target zone or enter a custom range.
   For example, you can select a heart rate zone. Each time you exceed or drop below the specified heart rate, the Edge beeps and displays a message.
8. If necessary, select Yes in the Rest Lap field.
   During a rest lap, the timer continues to run and data is recorded.
9. Select ✔ to save the step.
10. Select ✔ to save the workout.
Repeating Workout Steps
Before you can repeat a workout step, you must create a workout with at least one step.

1. Select **Add New Step**.
2. In the **Duration** field, select an option.
   - Select **Repeat** to repeat a step one or more times.
     For example, you can repeat a 5-mile step ten times.
   - Select **Repeat Until** to repeat a step for a specific duration.
     For example, you can repeat a 5-mile step for 60 minutes or until your heart rate reaches 160 bpm.
3. In the **Back To Step** field, select a step to repeat.
4. Select ✔ to save the step.

Starting a Workout
1. Select **MENU > Training > Workouts**.
2. Select a workout.
3. Select **Do Workout**.
4. Press **START**.

After you begin a workout, the Edge displays each step of the workout, the target (if any), and current workout data. An audible alarm sounds when you are about to finish a workout step. A message appears, counting down the time or distance until a new step begins.

Ending a Step
Press **LAP** to end a step early.

Stopping a Workout
Select **MENU > Training > Workouts > Stop Workout**.
About Editing Workouts
You can edit workouts within Garmin Connect, Garmin Training Center, or directly in the Edge. If you edit workouts in the Edge, your changes may be temporary. Garmin Connect and Garmin Training Center serve as the master list of workouts. If you edit a workout in the Edge, the changes might be overwritten the next time you transfer workouts from Garmin Connect or Garmin Training Center. To make a permanent change to a workout, edit the workout in Garmin Connect or Garmin Training Center and then transfer it to your Edge.

Editing a Workout Using the Edge
1. Select MENU > Training > Workouts.
2. Select a workout.
3. Select Edit.
4. Select a step.
5. Make any necessary changes, and select ✔ to save the step.
6. Select ✔ to save the workout.

Deleting a Workout
1. Select MENU > Training > Workouts.
2. Select a workout.
3. Select ✗ > Yes.

Using Virtual Partner
Your Virtual Partner® is a training tool designed to help you meet your goals.

1. Select MENU > Training > Virtual Partner.
2. Select Virtual Partner > On.
3. Select Virtual Partner Speed.
4. Enter a speed, and select ✔.
5. Go for a ride.
6. Scroll to the Virtual Partner page to see who is leading.
   At the top of the page, you can use + and - to adjust the speed of the Virtual Partner during your ride.

   **Virtual Partner Speed**
   If you make changes to the Virtual Partner speed before you start the timer, those changes are saved. Changes made to the Virtual Partner speed after the timer has started are applied only to the current session, and are not saved when the timer is reset. If you make changes to the Virtual Partner during an activity, the Virtual Partner uses the new speed from your location.

**Courses**
Courses allow you to follow a previously recorded activity. You can follow a saved course simply because it is a good route. For example, you can save a bike friendly commute to work. You can also follow a saved course, trying to match or exceed previously set performance goals. For example, if the original course was completed in 30 minutes, you will race against a Virtual Partner trying to complete the course in under 30 minutes.

Garmin recommends that you use Garmin Connect or Garmin Training Center (page 20) to create and transfer courses.
Course Points
You must use Garmin Training Center to add course points to a course. Course points are places on your course that you want to remember, such as water stops or distance goals.

Creating Courses with Your Edge
Before you can create a course, you must have history with GPS track data saved to the Edge.

1. Select MENU > Courses > Create New Course.
2. Select a previous ride on which to base your course.
3. Enter a name for the course, and select ✓.

Starting a Course
You can record a warmup activity separately on the Edge. Before you start the course, you must reset the timer.

1. Select MENU > Courses.
2. Select a course.
3. Review the course data pages (optional).
   You can also select to edit the course features. For example, you can change the color of the course line on the map.
4. Select Go.
   History is recorded even if you are not on the course. A message appears after you finish the course.

Following a Course From the Web
You must have a Garmin Connect account (page 20).

1. Connect the Edge to your computer.
2. Go to www.garminconnect.com, and find an activity.
3. Click Send to Device.
4. Disconnect the Edge, and turn it on.
5. Select MENU > Courses.
6. Select the course > Go.

**Off Course Options**
You can include a warmup before you begin your course. Press START to begin the course, and then warm up as normal. Stay away from your course path as you warm up. When you are ready to begin, head toward your course. When you are on any part of the course path, a message appears.

**NOTE:** As soon as you press START, your Virtual Partner starts the course and does not wait for you to warm up.

If you stray away from the course, the Edge displays a message. Use the course map or course points to find your way back to the course.

**Changing the Course Speed**
1. Select MENU > Courses.
2. Select a course > Go.
3. Scroll to the Virtual Partner page.
4. At the top of the page, use + and - to adjust the percentage of time to complete the course.

For example, to improve your course time by 20%, enter a course speed of 120%. You will race against the Virtual Partner to finish a 30-minute course in 24 minutes.

**Stopping a Course**
Select MENU > Courses > Stop Course.

**Deleting a Course**
1. Select MENU > Courses.
2. Select a course.
3. Select ❌ > Yes.
ANT+ Sensors

The Edge is compatible with the following ANT+ accessories:

- Heart rate monitor (page 13)
- GSC 10 speed and cadence sensor (page 15)
- Third-party ANT+ sensors (page 16)

For information about purchasing additional accessories, go to http://buy.garmin.com.

Pairing Your ANT+ Sensors

Before you can pair, you must put on the heart rate monitor or install the sensor. See the Edge 800 Quick Start Manual or the accessory package for instructions.

- Make sure that the ANT+ sensor is compatible with your Garmin device.
- Bring the Edge within range (3 m) of the accessory.
  Stay 10 m away from other ANT+ sensors while pairing.
- After you pair the first time, your Garmin device automatically recognizes the ANT+ sensor each time it is activated. This process occurs automatically when you turn on the Garmin device and only takes a few seconds when the sensors are activated and functioning correctly.
- When paired, your Garmin device only receives data from your sensor, and you can go near other sensors.
Putting on the Heart Rate Monitor
See the *Edge 800 Quick Start Manual* or the accessory package for instructions.

Pairing the Heart Rate Monitor
If you purchased a heart rate monitor separately, you must pair it with the Edge in order to view your heart rate data. Before you can pair, you must put on the heart rate monitor.

1. Turn on the Edge.
2. Bring the Edge within range (3 m) of the heart rate monitor.
3. Select `MENU > > Bike Settings > Heart Rate > ANT+ Heart Rate`.
4. Select `Heart Rate Monitor > Yes`.
5. Press `OK`.

When the heart rate monitor is paired, a message appears, and 📈 appears solid on the status page.

6. If necessary, select **Rescan**.
7. If necessary, customize heart rate data fields (page 31).

After you put on the heart rate monitor, it is on standby and ready to send data.

**TIP**: If heart rate data does not appear or if you have erratic heart rate data, you may have to tighten the strap on your chest or warm up for 5–10 minutes (page 18).

Setting Your Heart Rate Zones
The Edge uses your user profile information from the initial setup to determine your heart rate zones. For the most accurate calorie data during your ride, set your maximum heart rate, resting heart rate, and heart rate zones.
ANT+ Sensors

1. Select **MENU > Bike > Heart Rate > Heart Rate Zones**.

2. Enter your maximum heart rate and resting heart rate.
   The zone values update automatically; however, you can still edit each value manually.

3. Select **Based On** and select an option:
   - Select **BPM** to view and edit the zones in beats per minute.
   - Select **% Max.** to view and edit the zones as a percentage of your maximum heart rate.
   - Select **% HRR** to view and edit the zones as a percentage of your resting heart rate.

---

**About Heart Rate Zones**

Many athletes are using heart rate zones to measure and increase their cardiovascular strength and improve their level of fitness. A heart rate zone is a set range of heartbeats per minute.

The five commonly accepted heart rate zones are numbered from 1 to 5 according to increasing intensity. Generally, heart rate zones are calculated based on percentages of your maximum heart rate.

**Fitness Goals**

Knowing your heart rate zones can help you measure and improve your fitness by understanding and applying these principles:

- Your heart rate is a good measure of exercise intensity.
- Training in certain heart rate zones can help you improve
cardiovascular capacity and strength.

• Knowing your heart rate zones can prevent you from overtraining and can decrease your risk of injury.

If you know your maximum heart rate, you can enter it and allow the Edge to calculate your heart rate zones based on the percentages shown in the table (page 19).

If you do not know your maximum heart rate, use one of the calculators available on the Internet. Some gyms and health centers can provide a test that measures maximum heart rate.

**Installing the GSC 10**
See the *Edge 800 Quick Start Manual* or the accessory package for instructions.

**Pairing the GSC 10**
If you purchased a GSC 10 separately, you must pair it with the Edge in order to view your speed and cadence data. Before you can pair, you must install the GSC 10.

1. Turn on the Edge.
2. Bring the Edge within range (3 m) of the GSC 10.
3. Select **MENU > 🡽 > Bike Settings > Bike Profiles**.
4. Select a bike.
5. Select **ANT+ Speed/Cadence > Bike Sensors > Yes**.
6. Press 🟪.
   When the GSC 10 is paired, a message appears, and 🛡️ 🛡️ appear solid on the status page.
7. Customize optional data fields (page 31).
ANT+ Sensors

About the GSC 10
Cadence data from the GSC 10 is always recorded. If there is no GSC 10 paired, GPS data is used to calculate the speed and distance.

Cadence is your rate of pedaling or “spinning” measured by the number of revolutions of the crank arm per minute (rpm). There are two sensors on the GSC 10: one for cadence and one for speed.

For information about cadence alerts, see page 5.

Non-Zero Averaging for Cadence Data
The non-zero data-averaging setting is available if you are training with an optional cadence sensor. The default setting is to exclude zero values that occur when you are not pedaling.

To turn the non-zero averaging on or off, select MENU > Bike Settings > Data Recording > Data Averaging > Cadence.

Third-Party ANT+ Sensors
For a list of third-party ANT+ sensors that are compatible with the Edge, go to www.garmin.com/intosports.

Pairing Your Power Meter
Refer to the manufacturer’s instructions.

When the power meter is paired, a message appears, and appears solid on the status page.

Calibrating Your Power Meter
For calibration instructions specific to your power meter, refer to the manufacturer’s instructions.

Before you can calibrate your power meter, it must be properly installed and actively recording data.
1. Select **MENU > Bike Settings > Bike Profiles**.
2. Select a bike.
3. Select **ANT+ Power > Calibrate**.
4. Keep your power meter active by pedaling until a message appears.

**Setting Your Power Zones**

You can set seven custom power zones using Garmin Connect or Garmin Training Center. If you know your functional threshold power (FTP) value, you can enter it and allow the Edge to calculate your power zones automatically.

1. Select **MENU > Bike Settings > Bike Profiles**.
2. Select a bike.
3. Select **Power Zones**.
4. Enter your FTP value.
5. Select **Based On** and select an option:

- Select **Watts** to view and edit the zones in watts.
- Select **% FTP** to view and edit the zones as a percentage of your functional threshold power.

**Non-Zero Averaging for Power Data**

The non-zero data-averaging setting is available if you are training with an optional power meter. The default setting is to exclude zero values that occur when you are not pedaling.

To turn the non-zero averaging on or off, select **MENU > Bike Settings > Data Recording > Data Averaging > Power**.
### ANT+ Sensor Troubleshooting

<table>
<thead>
<tr>
<th>Problem</th>
<th>Solution</th>
</tr>
</thead>
</table>
| The ANT+ sensor will not pair with my device.     | • Stay 10 m away from other ANT+ sensors while pairing.  
|                                                   | • Bring the device within range (3 m) of the heart rate monitor while pairing.  
|                                                   | • If the problem persists, replace the battery.                                                                                           |
| I have a third-party ANT+ sensor.                 | Make sure that it is compatible with the Edge (www.garmin.com/intosports).                                                              |
| The heart rate data is inaccurate or erratic.     | • Make sure that the heart rate monitor is snug against your body.  
|                                                   | • Reapply moisture to the electrodes. Use water, saliva, or electrode gel.  
|                                                   | • Clean the electrodes. Dirt and sweat residue on the electrodes can interfere with heart rate signals.  
|                                                   | • Position the electrodes on your back instead of your chest.  
|                                                   | • Wear a cotton shirt or wet your shirt if suitable for your activity. Synthetic fabrics that rub or flap against the heart rate monitor can create static electricity that interferes with heart rate signals.  
|                                                   | • Move away from sources of strong electromagnetic fields and some 2.4 GHz wireless sensors, which can interfere with your heart rate monitor. Sources of interference may include high-voltage power lines, electric motors, microwave ovens, 2.4 GHz cordless phones, and wireless LAN access points.  |
# Heart Rate Zones

<table>
<thead>
<tr>
<th>% of Maximum Heart Rate or Resting Heart Rate</th>
<th>Perceived Exertion</th>
<th>Benefits</th>
</tr>
</thead>
<tbody>
<tr>
<td>1  50% to 60%</td>
<td>Relaxed, easy pace; rhythmic breathing</td>
<td>Beginning-level aerobic training; reduces stress</td>
</tr>
<tr>
<td>2  60% to 70%</td>
<td>Comfortable pace; slightly deeper breathing, conversation possible</td>
<td>Basic cardiovascular training; good recovery pace</td>
</tr>
<tr>
<td>3  70% to 80%</td>
<td>Moderate pace; more difficult to hold conversation</td>
<td>Improved aerobic capacity; optimal cardiovascular training</td>
</tr>
<tr>
<td>4  80% to 90%</td>
<td>Fast pace and a bit uncomfortable; breathing forceful</td>
<td>Improved anaerobic capacity and threshold; improved speed</td>

</tbody>
</table>
History

Your Edge automatically saves history when the timer is started. When the Edge memory is full, a message appears. The Edge does not automatically delete or overwrite your history. See page 21 to learn how to delete history.

Upload your history (page 20) to Garmin Connect or Garmin Training Center periodically to keep track of all of your ride data.

History includes time, distance, calories, average speed, maximum speed, altitude, and detailed lap information. Edge history can also include heart rate, cadence, and power.

NOTE: History is not recorded while the timer is stopped or paused.

Viewing a Ride

Select MENU > History > Activities.

Viewing Distance and Time Totals

Select MENU > History > Totals to view the accumulated ride distance and time.

Using Free Software

Garmin provides two software options for storing and analyzing your ride data:

- Garmin Connect is Web-based software.
- Garmin Training Center is computer software that does not require the Internet after installation.

2. Select your product.
3. Click **Software**.
4. Follow the on-screen instructions.

**Transferring History to Your Computer**

**NOTICE**
To prevent corrosion, thoroughly dry the mini-USB port, the weather cap, and the surrounding area before charging or connecting to a computer.

1. Connect the USB cable to an available USB port on your computer.
2. Pull up the weather cap ➊ from the mini-USB port ➋.
3. Plug the small end of the USB cable into the mini-USB port.
4. Open Garmin Connect ([www.garminconnect.com](http://www.garminconnect.com)), or open Garmin Training Center.
5. Follow the instructions included with the software.

**Deleting History**
After you have transferred your history to your computer, you may want to delete the history from your Edge.

1. Select **MENU > History > Delete**.
2. Select an option:
   - Select **All Activities** to delete all ride data from the history.
   - Select **Old Activities** to delete activities recorded more than one month ago.
   - Select **All Totals** to reset the ride distance and time totals.
History

NOTE: This does not delete any history.

3. Select Yes.

Data Recording

The Edge uses smart recording. It records key points where you change direction, speed, or heart rate.

When a third-party power meter (page 16) is paired, the Edge records points every second. Recording points every second uses more of the available memory on the Edge.

For information about non-zero averaging for cadence and power data, see pages 16–17.

Changing the Data Storage Location

1. Select MENU > 📄 > System > Data Recording > Record To.

2. Select Internal Storage (device memory) or Memory Card (optional memory card is required).

Installing a MicroSD Card

You can purchase microSD memory cards from an electronics supplier, or purchase preloaded detailed map data cards from your Garmin dealer.

1. Pull up the weather cap ➊ from the microSD card slot ➋.
2. To insert the card, press it in until it clicks.

Data Management
You can use the Edge as a USB mass storage device.

NOTE: The device is not compatible with Windows® 95, 98, Me, or NT. It is also not compatible with Mac® OS 10.3 and earlier.

Connecting the USB Cable

1. Connect the USB cable to a USB port on your computer.
2. Pull up the weather cap from the mini-USB port.
3. Plug the small end of the USB cable into the mini-USB port.

Your device and memory card (optional) appear as removable drives in My Computer on Windows computers and as mounted volumes on Mac computers.

Loading Files
After you have connected the device to your computer, you can manually load the following files to your device: .tcx, .fit, .gpx, and .crs.

1. Browse your computer for the file.
2. Select Edit > Copy.
3. Open the “Garmin” drive or volume.
4. Open the Garmin\NewFiles folder or volume.
5. Select Edit > Paste.
Deleting Files

**NOTICE**

Your device memory contains important system files that should not be deleted.

After you have connected the device to your computer, you can manually delete files.

1. Open the Garmin or memory card drive or volume.
2. Select the file.
3. Press the **Delete** key on your keyboard.

Disconnecting the USB Cable

When you are finished managing your files, you can disconnect the USB cable.

1. Complete an action:
   - For Windows computers, click the eject icon in your system tray.
   - For Mac computers, drag the volume icon to the Trash.
2. Unplug the device from your computer.
Navigation

This section describes the following features and settings:

- Locations and Where to? (page 25)
- Route settings (page 27)
- Optional maps (page 28)
- Map settings (page 30)

Locations
You can record and store locations in the device.

Saving Your Location
You can save your present location, such as your home or parking spot. Before you can save your location, you must locate satellite signals.

1. From the map, select the position icon.

   The position icon represents your location on the map.

2. Select Save, or Save and Edit.

Saving Locations From the Map
1. From the map, select

2. Browse the map for the location.

   A tack marks the location, and location information appears at the top of the map.

3. Select the title to view additional location information.

4. Select > OK to save the location.
Navigating to a Saved Location
1. Select MENU > Where To? > Locations.
2. Select a location > Go.

Navigating to Recently Found Locations
Your device stores the last 50 locations you have found.
1. Select MENU > Where To? > Recent Finds.
2. Select a location > Go.

Navigating to Known Coordinates
1. Select MENU > Where To? > Coordinates.
2. Enter the coordinates, and select ✔.
3. Select Go.

Navigating Back to Start
At any point during your ride, you can return to your starting point. You must start the timer in order to use this feature.

1. During your ride, press STOP, but do not reset the timer.
2. Select MENU > Where To? > Back to Start > Go.

The Edge navigates you back to the starting point your ride.

Stopping the Navigation
While navigating to a location, select MENU > Where To? > Stop Navigation.
Projecting a Location
You can create a new location by projecting the distance and bearing from a marked location to a new location.

1. Select MENU > Where To? > Locations.
2. Select a location.
3. Select the title.
4. Select 📑.
5. Select Project Location.
6. Enter the bearing and distance to the projected location.
7. Select Save or Save and Edit.

Editing Locations
1. Select MENU > Where To? > Locations.
2. Select a location.
3. Select the title.
4. Select 📑.
5. Select an attribute.
   For example, select Change Elevation to enter a known altitude for the location.
6. Enter the new information.

Deleting Locations
1. Select MENU > Where To? > Locations.
2. Select a location.
3. Select the title.
4. Select 📑 > Delete Location.

Route Settings
Select MENU > 📑 > System > Routing.

- Guidance Method—allows you to select a guidance method for calculating your route.
  - Off Road—calculates point-to-point routes.
Navigation

- **On Road For Time** (requires routable maps)—calculates on-road routes that require minimal time to drive.

- **On Road For Distance** (requires routable maps)—calculates on-road routes that are shorter in distance.

- **Calculates Routes for**—allows you to select a transportation method in order to optimize your route.

- **Lock On Road** (requires routable maps)—locks the current location marker on the nearest road, compensating for variances in map position accuracy.

- **Off Road Transitions**
  - **Auto**—automatically routes you to the next point.
  - **Manual**—allows you to select the next point on the route by using the point on the active route page.

- **Distance**—routes you to the next point on the route when you are within a specified distance of your current point.

- **Avoidance Setup** (requires routable maps)—allows you to select the road type you want to avoid.

**Purchasing Additional Maps**

Go to [http://buy.garmin.com](http://buy.garmin.com) or contact your Garmin dealer.

To determine the versions of the maps that are loaded on your Edge, select **MENU > 🗺 > System > Map > Map Information**.

**Finding an Address**

You can use optional City Navigator® maps to search for addresses, cities, and other locations. The detailed and routable maps contain millions of points of interest, such as restaurants, hotels, and auto services.
1. Select **MENU > Where To? > Address**.

2. If necessary, change the state, the country, or the province.

3. Select **Spell City**.
   
   **TIP**: If you are unsure of the city, select **Search All**.

4. Enter the city, and select ✔.

5. If necessary, select the city.

6. Select **Enter House Number**, enter the number, and select ✔.

7. Select **Enter Street Name**, enter the name, and select ✔.

8. If necessary, select the street.

9. If necessary, select the address.

10. Select **Go**.

### Finding a Point of Interest

1. Select **MENU > Where To?**.

2. Select a category.

   **TIP**: If you know the name of the business, select **All POI > A** to enter the name.

3. If necessary, select a subcategory.

4. Select a location > **Go**.

### Finding Nearby Locations

1. Select **MENU > Where To?**.

2. Select ✔.

3. Select an option.

4. Select a category and subcategory, if necessary.

5. Select a location > **Go**.
Changing the Map Orientation
1. Select MENU > System > Map > Orientation.
2. Select an orientation:
   - Select North Up to show north at the top of the page.
   - Select Track Up to show your current direction of travel at the top of the page.
   - Select Automotive Mode to show a perspective view.

Map Settings
Select MENU > System > Map.
- **Orientation**—allows you to select how the map appears (page 30).
- **Auto Zoom**—automatically selects the appropriate zoom level for optimal use on your map. When Off is selected, you must zoom in or out manually.
- **Map Visibility**—allows you to set advanced map features. Auto and High Contrast have preset values. You can choose Custom to set each value.
  - **Zoom Levels**—map items draw or appear at or below the selected zoom level.
  - **Text Size**—allows you to select the text size for map items.
  - **Detail**—allows you to select the amount of map data that appears.
    - **Zoom Levels**—map items draw or appear at or below the selected zoom level.
    - **Text Size**—allows you to select the text size for map items.
    - **Detail**—allows you to select the amount of map data that appears.
    - **Shaded Relief**—shows detail relief on the map (if available) or turns off shading.
- **Map Information**—allows you to enable or disable the maps currently loaded on the device.

NOTE: Higher detail settings may cause the map to redraw slowly.
Settings

You can customize the Edge settings and features:

- Data fields (page 31)
- Bike profiles (page 36)
- Training settings (page 36)
- System settings (page 39)
- User Profile settings (page 42)

Customizing Your Data Fields

You can set up custom data fields for three timer pages, the course page, the workout page, the elevation profile page, and the map.

1. Select MENU > Bike Settings > Data Fields.
2. Select a page.
3. Select the number of data fields you want to see on the page.
4. Select a data field to change it.

To turn off an optional page, set the number of data fields to Off.

Data Fields

Data fields with the * symbol display statute or metric units. Data fields with the ** symbol require an ANT+ sensor.

5. If you are using a speed and cadence sensor or power sensor, select **Wheel Size**.
   - Select **Automatic** to calculate your wheel size using GPS distance.
   - Select **Custom** to enter your wheel size. For a table of wheel sizes and circumferences, see page 50.

**Updating Your Bike Profile**

You can customize three bike profiles. The Edge uses the bike weight, the odometer value, and the wheel size to calculate accurate ride data.

1. Select **MENU > Bike Settings > Bike Profiles**.
2. Select a bike.
3. Select **Bike Details**.
4. Enter a name for the bike profile, the bike weight, and the odometer value.

**Training Settings**

**Marking Laps by Position**

You can use Auto Lap® to automatically mark the lap at a specific position. This feature is helpful for comparing your performance over different parts of a ride (for example, a long climb or training sprints). During courses, use the By Position option to trigger laps at all of the lap positions saved in the course.
1. Select **MENU > Bike Settings > Auto Lap > Auto Lap Trigger**.

2. Select **By Position**.

3. Select **Lap At**.

4. Select an option:
   - Select **Lap Press Only** to trigger the lap counter each time you press **LAP** and each time you pass any of those locations again.
   - Select **Start And Lap** to trigger the lap counter at the GPS location where you press **START** and at any location during the ride where you press **LAP**.
   - Select **Mark And Lap** to trigger the lap counter at a specific GPS location marked before the ride and at any location during the ride where you press **LAP**.

5. If necessary, customize the lap data fields (page 31).

### Marking Laps by Distance

You can use Auto Lap to automatically mark the lap at a specific distance. This feature is helpful for comparing your performance over different parts of a ride (for example, every 10 miles or 40 kilometers).

1. Select **MENU > Bike Settings > Auto Lap > Auto Lap Trigger**.

2. Select **By Distance**.

3. Select **Lap At**.

4. Enter a value.

5. If necessary, customize the lap data fields (page 31).
Settings

**Using Auto Pause**
You can use Auto Pause® to pause the timer automatically when you stop moving or when your speed drops below a specified value. This feature is helpful if your ride includes stop lights or other places where you need to slow down or stop.

**NOTE:** The paused time is not saved with your history data.

1. Select **MENU > Bike Settings > Auto Pause > Auto Pause Mode**.
2. Select an option:
   - Select **When Stopped** to pause the timer automatically when you stop moving.
   - Select **Custom Speed** to pause the timer automatically when your speed drops below a specified value.
3. If necessary, customize optional time data fields (page 31).
   To view the entire time (from pressing **START** to **RESET**), select the **Time - Elapsed** data field.

**Using Auto Scroll**
You can use the auto scroll feature to automatically cycle through all of the training data pages while the timer is running.

1. Select **MENU > Bike Settings > Auto Scroll > Auto Scroll Speed**.
2. Select a display speed: **Slow**, **Medium**, or **Fast**.
Changing the Start Notice
This feature automatically detects when your device has acquired satellites and is moving. It is a reminder to start the timer so you can record your ride data.

1. Select MENU > 🛑 > Bike Settings > Start Notice > Start Notice Mode.
2. Select an option:
   - Select Once.
   - Select Repeat > Repeat Delay to change the amount of time to delay the reminder.

System Settings
- GPS Settings (page 39)
- Display Settings (page 40)
- Map Settings (see Navigation, page 30)
- Route Settings (see Navigation, page 27)

GPS Settings
Training Indoors
1. Select MENU > 🛑 > System > GPS > GPS Mode.
2. Select Off.
When GPS is off, speed and distance data are not available unless you have an optional sensor that sends speed and distance data to the Edge (such as the GSC 10). The next time you turn on the Edge, it will search for satellite signals again.

- Data Recording Settings (see History, page 22)
- Unit Settings (page 41)
- System Setup (page 41)
- Configuration Settings (page 41)
- Weight Scale Settings (page 42)
Settings

**Setting Your Elevation**
If you have accurate elevation data for your present location, you can manually calibrate the altimeter on your device.

1. Select **MENU > System > GPS > Set Elevation**.
2. Enter the elevation, and select ✔.

**Marking Your Location**
1. Select **MENU > System > GPS > Mark Location**.
2. Select **Save** to save your present location, or **Save and Edit**.

**Satellite Page**
The satellite page shows your current GPS satellite information.

Select **MENU > System > GPS > View Satellites**.

On the satellite page, GPS accuracy appears at the bottom of the page. The green bars represent the strength of each satellite signal received (the number of the satellite appears below each bar).

For more information about GPS, go to [www.garmin.com/aboutGPS](http://www.garmin.com/aboutGPS).

**Display Settings**
Select **MENU > System > Display**.

- **Backlight Timeout**—see page 47.
- **Background**—sets the background image (wallpaper).
- **Screen Capture**—allows you to take screen captures on the device.
- **Screen Calibration**—see page 52.
Customizing the Unit Settings

You can customize units of measure for distance and speed, elevation, temperature, weight, and position format.

1. Select MENU > System > Units.
2. Select a setting.
3. Select a unit for the setting.

System Setup

Select MENU > System > System Setup.

- **Language**—sets the device language.
- **Tones**—sets the audible tones.
- **Time Format**—sets the time format to 12 hour or 24 hour.
- **Auto Power Down**—see page 47.

Time Zones

Each time you turn on the device and acquire satellites, the device automatically detects your time zone and the current time of day.

Changing the Configuration Settings

You can modify all of the settings you configured in the initial setup.

1. Select MENU > System > Initial Setup > Yes.
2. Turn off the device.
3. Turn on the device.
4. Follow the on-screen instructions.
Settings

Using the Weight Scale
If you have an ANT+ compatible weight scale, the Edge can read the data from the weight scale.

1. Select MENU > System > Weight Scale.
   A message appears when the weight scale is found.

2. Stand on the scale when indicated.
   **NOTE**: If using a body composition scale, remove shoes and socks to ensure that all body composition parameters are read and recorded.

3. Step off the scale when indicated.
   **TIP**: If an error occurs, step off the scale. Step on when indicated.

User Profile Settings
You can update your gender, age, weight, height, and activity class settings. The device uses this information to calculate accurate ride data.

Select MENU > User Profile.

About Calories
Calorie expenditure and heart rate analysis technology is provided and supported by Firstbeat Technologies Ltd. For more information, go to www.firstbeattechnologies.com.
Appendix

Registering Your Device
Help us better support you by completing our online registration today.

• Go to http://my.garmin.com.
• Keep the original sales receipt, or a photocopy, in a safe place.

About the Edge
To display important software information and your unit ID, select MENU > About Edge.

Updating the Software
1. Select an option:
   • Use Garmin Connect. Go to www.garminconnect.com.
2. Follow the on-screen instructions.

Contacting Garmin Product Support
Contact Garmin Product Support if you have any questions about this product.

• In the USA, go to www.garmin.com/support, or contact Garmin USA by phone at (913) 397.8200 or (800) 800.1020.
• In the UK, contact Garmin (Europe) Ltd. by phone at 0808 2380000.
• In Europe, go to www.garmin.com/support and click Contact Support for in-country support.
Buying Optional Accessories

Go to http://buy.garmin.com, or contact your Garmin dealer for information about optional accessories and replacement parts.

Caring for Your Device

**NOTICE**
Do not store the device where prolonged exposure to extreme temperatures can occur, because it can cause permanent damage.

Never use a hard or sharp object to operate the touchscreen, or damage may result.

Avoid chemical cleaners and solvents that can damage plastic components.

Cleaning the Device

1. Use a cloth dampened with a mild detergent solution.
2. Wipe it dry.

Cleaning the Screen

1. Use a soft, clean, lint-free cloth.
2. If necessary, use water, isopropyl alcohol, or eyeglass lens cleaner.
3. Apply the liquid to the cloth, and gently wipe the screen with the cloth.

Specifications

**NOTICE**
The Edge is waterproof to IEC Standard 60529 IPX7. It can withstand immersion in 1 meter of water for 30 minutes. Prolonged submersion can cause damage to the device. After submersion, be certain to wipe dry and air dry the device before using or charging.

About the Battery

⚠️ WARNING

This product contains a lithium-ion battery. See the *Important Safety and Product Information* guide in the product box for product warnings and other important information.
Maximizing Battery Life
Extensive use of screen backlighting can significantly reduce battery life.

Decreasing the Backlight
1. Press $\mathbf{a}$ to open the status page.
2. Adjust the brightness.

Adjusting the Backlight Timeout
1. Select MENU $\mathbf{b}$ > System $\mathbf{c}$ > Display $\mathbf{d}$ > Backlight Timeout.
2. Select a short backlight timeout.

Turning On the Auto Power Down Feature
This feature automatically turns the Edge off after 15 minutes of inactivity.
1. Select MENU $\mathbf{b}$ > System $\mathbf{c}$ > System Setup $\mathbf{d}$ > Auto Power Down.
2. Select On.

Charging the Edge

**NOTICE**
To prevent corrosion, thoroughly dry the mini-USB port, the weather cap, and the surrounding area before charging or connecting to a computer.

1. Plug the AC charger into a standard wall outlet.
2. Pull up the weather cap $\mathbf{1}$ from the mini-USB port $\mathbf{2}$.
Appendix

3. Plug the small end of the AC charger into the mini-USB port.
   To connect the device to your computer using the USB cable, see page 21.

4. Charge the device completely.
   A fully charged battery can run for up to 15 hours before it must be recharged.

Heart Rate Monitor and GSC 10 Batteries

⚠️ WARNING
Do not use a sharp object to remove user-replaceable batteries.

⚠️ CAUTION
Contact your local waste disposal department to properly recycle the batteries. Perchlorate Material – special handling may apply. See www.dtsc.ca.gov/hazardouswaste/perchlorate.

Replacing the Heart Rate Monitor Battery

1. Use a small Phillips screwdriver to remove the four screws on the back of the module.

2. Remove the cover and battery.

3. Wait 30 seconds.

4. Insert the new battery with the positive side facing up.

   NOTE: Do not damage or lose the O-ring gasket.

5. Replace the back cover and the four screws.

   After you replace the heart rate monitor battery, you must pair it with the device again.
Replacing the GSC 10 Battery

1. Locate the circular battery cover ➊ on the side of the GSC 10.

2. Use a coin to twist the cover counter-clockwise until it is loose enough to remove (arrow points to unlocked).

3. Remove the cover and the battery ➋.

4. Wait 30 seconds.

5. Insert the new battery with the positive side facing up.

6. Use a coin to twist the cover clockwise back into place (arrow points to locked).

NOTE: Be careful not to damage or lose the O-ring gasket on the cover.

After you replace the GSC 10 battery, you must pair it with the device again.
Appendix

**Wheel Size and Circumference**

The wheel size is marked on both sides of the tire. To modify your bike profile, see page 36.

<tbody>
<tr>
<td>I need to calibrate the touchscreen.</td>
<td>Select <strong>MENU &gt; 🗄️ &gt; System &gt; Display &gt; Screen Calibration.</strong></td>
</tr>
<tr>
<td>The keys do not respond. How do I reset the Edge?</td>
<td>Press and hold 🔄 for 10 seconds.</td>
</tr>
<tr>
<td><strong>NOTE:</strong> This does not erase any of your data or settings.</td>
<td></td>
</tr>
<tr>
<td>I want to clear all the user data from my Edge.</td>
<td><strong>NOTE:</strong> This deletes all user-entered information, but it does not delete your history.</td>
</tr>
<tr>
<td></td>
<td>1. Turn off the device.</td>
</tr>
<tr>
<td></td>
<td>2. Place your finger on the top left corner of the touchscreen.</td>
</tr>
<tr>
<td></td>
<td>3. While holding your finger on the touchscreen, turn on the device.</td>
</tr>
<tr>
<td></td>
<td>4. Select <strong>Yes</strong>.</td>
</tr>
<tr>
<td>My device does not acquire satellite signals.</td>
<td>1. Take your device out of parking garages and away from tall buildings and trees.</td>
</tr>
<tr>
<td></td>
<td>2. Turn on the device.</td>
</tr>
<tr>
<td></td>
<td>3. Remain stationary for several minutes.</td>
</tr>
<tr>
<td>The battery does not last long.</td>
<td>Reduce the backlight brightness and timeout (<a href="#">page 47</a>).</td>
</tr>
<tr>
<td>How do I know my Edge is in USB mass storage mode?</td>
<td>You should see a new removable disk drive in My Computer on Windows computers and a mounted volume on Mac computers.</td>
</tr>

</tbody>
</table>
| My Edge is connected to the computer, but it will not go into mass storage mode. | You may have loaded a corrupted file.  
1. Disconnect the Edge from your computer.  
2. Turn off the Edge.  
3. Press and hold **RESET** while you connect the Edge to your computer.  
Continue pressing **RESET** for 10 seconds or until the Edge goes into mass storage mode. |
| I cannot see any new removable drives in my list of drives.             | If you have several network drives mapped on your computer, Windows may have trouble assigning drive letters to your Garmin drives. See the Help file for your operating system to learn how to assign drive letters. |
| My course, route, or track file was renamed.                           | You can load .tcx, .gpx, and .crs files to the Edge. When you select the course for any reason, the file is converted to a .fit course file. |
| I cannot find the waypoint I transferred to the device.                | Waypoints are converted and added your locations.fit file. Select **MENU > Where To? > Locations**.                                           |
| Some of my data is missing from my Edge history.                       | When the Edge memory is full, it will no longer record data. Transfer data to your computer regularly to avoid losing data.                 |
| I need to replace the bands for the mount.                            | Go to [http://buy.garmin.com](http://buy.garmin.com), or contact your Garmin dealer. Purchase bands made of EPDM only. |
