Oregon units operate on two AA batteries. Use alkaline, NiMH, or lithium batteries. Use precharged NiMH or lithium batteries for best results. Standard alkaline batteries are not recommended for Oregon 550 units when using the camera feature.

To install the batteries:
1. Lift the latch and remove the battery cover.
2. Insert the batteries, observing polarity.
3. Replace the battery cover and push the latch down.

To select the battery type:
1. Touch Setup > System > Battery Type.
2. Select Alkaline, Lithium, or NiMH.
Notice
Remove batteries when you do not plan to use the Oregon for several months. Stored data is not lost when batteries are removed.

To open the Compass page:
Touch **Compass**.

The bearing pointer points to your destination, regardless of the direction you are moving. If the bearing pointer points toward the top of the compass, you are traveling directly toward your destination. If it points any other direction, turn toward that direction until the arrow is pointing toward the top of the compass.

Calibrate the compass after moving long distances, experiencing temperature changes, or changing the batteries.

To calibrate the electronic compass:
1. While outdoors, hold the Oregon level and do not stand near objects that influence magnetic fields, such as cars, buildings, or overhead power lines.
2. Touch **Setup > Heading > Press To Begin Compass Calibration**.
3. Touch **Start** and follow the on-screen directions.
